ePMP 4600 Series Subscriber Modules

Service providers face ever-increasing demand for capacity in a limited amount of spectrum. Cambium Networks ePMP™ Force 4600 Series Subscriber Modules (SM) meet this demand offering high performance and low latency across both point-to-multipoint (PMP) and point-to-point (PTP) deployments.

The Force 4600 Series SMs are available in two form factors:

- Connectorized with 2 x RP-SMA connectors
- Integrated with a 25 dBi dish antenna.

Both models include the following:

- High capacity and latencies less than 5 ms when using ePTP technology.
- Interoperability with the ePMP 4600 Series Access Points (AP).
- Force 4600C and Force 4625 provide 2+ and 1 Gbps capacity, respectively, in PTP applications, meeting the requirements of enterprise, industrial, government, and service provider users.

- Managed by Cambium Networks cnMaestro™ management system for easy provisioning, monitoring, and upgrades.
- Network planning with LINKPlanner and cnHeat.
- Three-year hardware warranty and support from Cambium Networks.
- Each SM comes with a Power over Ethernet (PoE) injector and pole mount hardware.
