

Personal Wi-Fi

Privacy for all your devices

Connectivity That Just Works

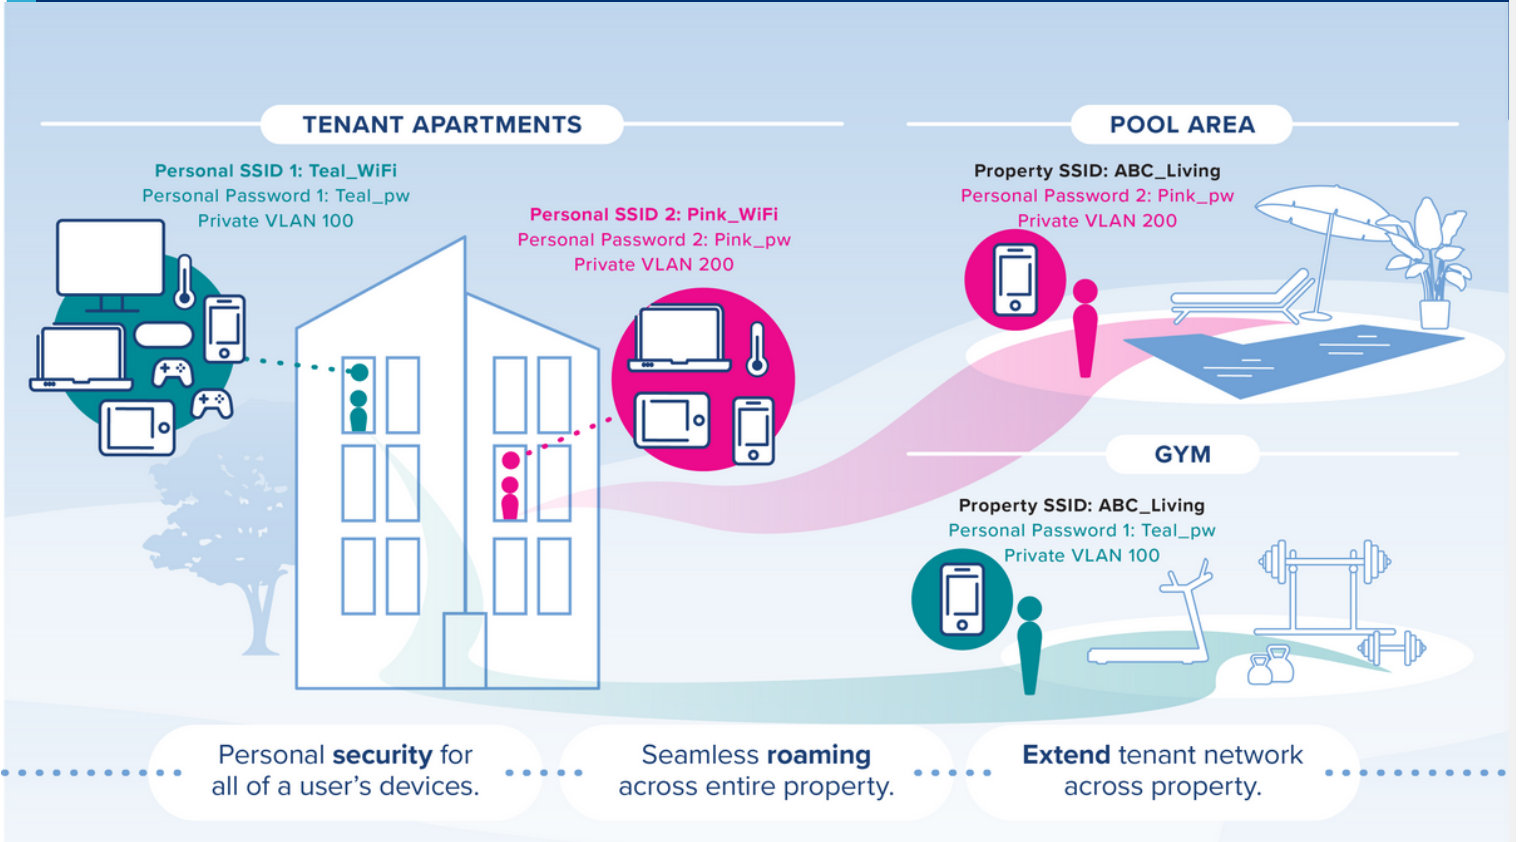

Personal Privacy in Public Networks

Personal Wi-Fi is a unique solution for providing personalized secure internet access in public network environments.

Use Cases

- Multi-dwelling / apartment units
- Senior living
- Retail
- Public venues

Residents maintain a consistent secure connection no matter where they are on a property.

Contact Us

Key Benefits

-  Each user has their own secure Wi-Fi network with ubiquitous connectivity
-  Maintain security via a unique ePSK and unique VLAN
-  Provide a unique SSID for user in personal space but with a common property SSID in public areas

-  Credentials are common across all networks; roaming is seamless
-  A personalized approach ensuring tenant privacy and security while minimizing administrative overhead

Personal Wi-Fi Made Easy!
