

cnVision

Purpose-Built Wireless Transport for Video Surveillance / CCTV

QUICK LOOK:

- **Robust wireless links optimized for video traffic**
- **Up to 600 Mbps – 50 feet to 5 miles (15 meters to 8 kilometers)**
- **Directly power/connect up to 3 PoE cameras or other PoE devices with MAXrp**
- **Outdoor deployments for all weather conditions**
- **Compatible with IP-based cameras (including ONVIF integration)**
- **VMS Integration**

cnVision is a purpose-built wireless transport solution for CCTV and video surveillance applications. System integrators around the world use cnVision to deploy cameras quickly and securely where they are needed, rather than just where the fiber extends. cnVision is deployable in both point-to-point and point-to-multipoint topologies. Combining unique capabilities like ONVIF® integration for cameras and VMS integration for management with Cambium Networks' proven radio technology, cnVision gives system integrators the tools they need to deploy private wireless surveillance networks profitably and reliably.

The cnVision portfolio consists of six different hardware modules and the software that makes planning, deployment, and management straightforward and reliable for even the most critical security and surveillance requirements. In simple point-to-point-deployments the Client MINI, and MAXr or MAXrp can be deployed at ranges from 15 meters to 8 kilometers (50 feet to 5 miles).

Where multiple camera locations are needed surrounding a building or property, a hub and spoke or point-to-multipoint architecture can be deployed with the HUBr or FLEX360 serving as the hub and any of the clients serving as the spokes.

Client MAXrp is the latest addition to cnVision, which simplifies edge camera deployments with integrated wireless transport plus three PoE output ports directly connecting to cameras or other security devices. Three integrated PoE output ports eliminate extra cabling; separate power supplies and an Ethernet switch, simplifying the installation. Any combination of three standard PoE devices can be used with the MAXrp, including cameras, Wi-Fi access points, digital signs, access controls, emergency phones, etc.

Designed and built for outdoor conditions, cnVision has models with IP67 ruggedization, and all hardware includes Cambium Networks' 3-year hardware warranty.

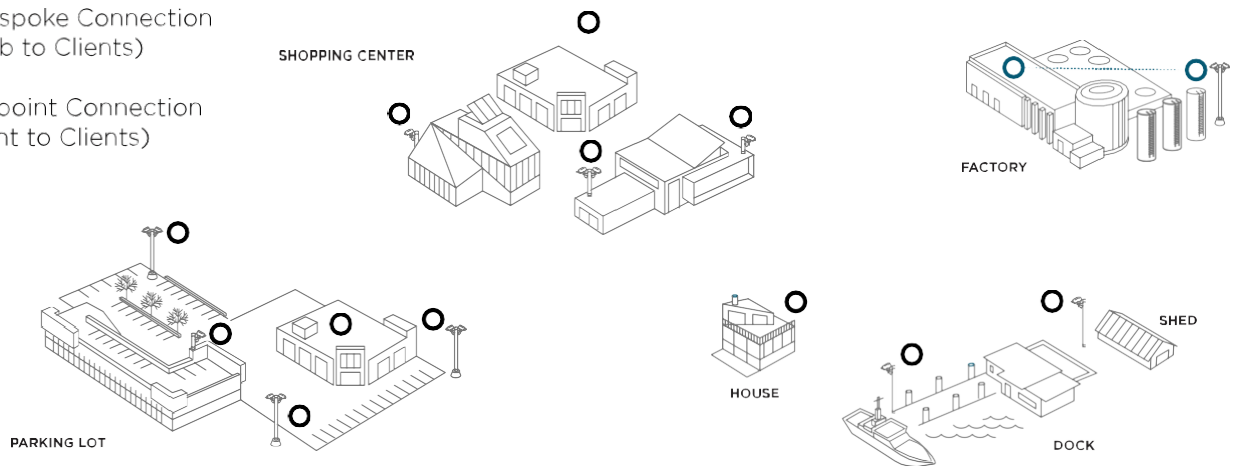

Plan your CCTV/Video surveillance wireless network using the [cnVision Companion Tool](#) to determine how many cameras at which particular frame rate and resolution can be carried by each cnVision client.

Contact your cnVision system integrator for more information or visit www.cambiumnetworks.com/cnvision.

cnVision for Wireless Video Surveillance

○ Hub-and-spoke Connection
(Hub to Clients)

○ Point-to-point Connection
(Client to Clients)

Features

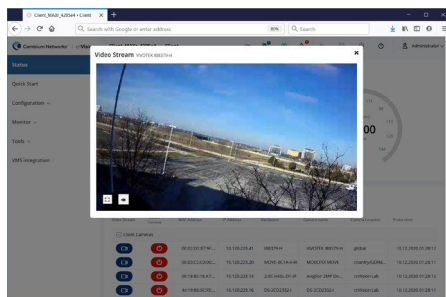

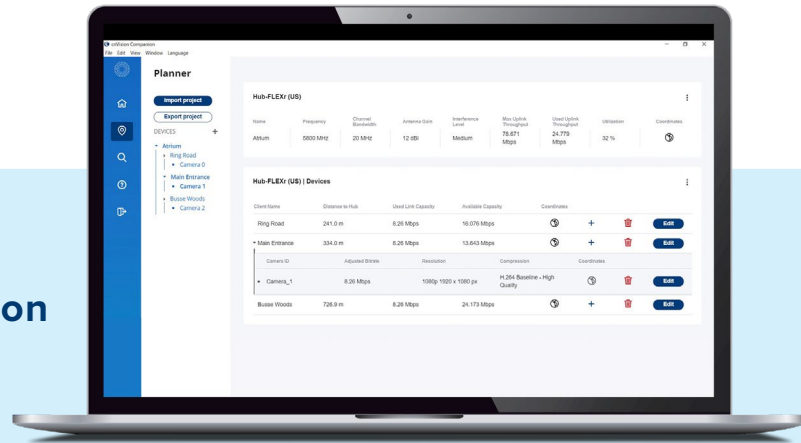

CCTV Centric Wireless	Proprietary wireless interface minimizing frame loss, jitter, and latency while maximizing video transmission performance
ONVIF	ONVIF support to detect camera models, stream information
VMS Integration	Integrates most popular video management systems for monitoring radio performance. <i>See next page or visit http://www.cambiumnetworks.com/cnvision for list of supported VMS.</i>
PoE Output Ports	Connect up to 3 external PoE cameras directly to the MAXrp; 2 Standard PoE and 1 Passive 24/56 V or non-standard devices
All-In-One Management	Accompanying tool to discover, plan, configure, and monitor
Range	50 feet to 5 miles (15 meters to 8 kilometers) with optional antenna accessories
Max Throughput	Up to 600 Mbps of UDP/TCP throughput
Security	128-bit AES Encryption (256-bit option where allowed), HTTPS, SSH, RADIUS management
Reliability	-30°C to 60°C (-22°F to 140°F) operation, IP55 & IP67 options
Warranty & Support	3-year warranty, 24/7 support

**MAXrp Powers
Cameras Directly via
3 PoE Output Ports**

ABOUT CAMBIUM NETWORKS

Cambium Networks enables service providers, enterprises, industrial organizations, and governments to deliver exceptional digital experiences and device connectivity with compelling economics. Our ONE Network platform simplifies management of Cambium Networks' wired and wireless broadband and network edge technologies. Our customers can focus more resources on managing their business rather than the network. We deliver connectivity that just works.
